Add 45%  
Alloy 514

Anodized finishes are not just coatings... they are a part of the finished aluminum letter. Anodizing is an electrochemical process that hardens aluminum and allows it to be colorized. We perform our own anodizing to ensure your letters within the same order have color consistency and are delivered to you within days. Some of the many reasons to have Gemini anodize your aluminum letters include: **Abrasion and weather resistant; Beautiful finish; Increases hardness and durability; Will not crack or peel; Unaffected by sunlight / UV; Environmentally friendly; Cost effective.** Note: Polished anodized finishes are not available in Cast Aluminum, and due to the anodizing process, colors may vary slightly from order to order.

Note: Vertical grain is standard all all cast aluminum and bronze letters. Horizontal grain can be requested.

### Standard Cast Bronze Finishes

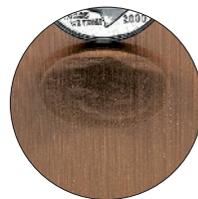

#### Bronze Finishes

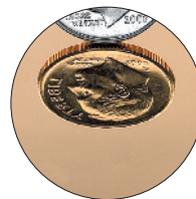

Brushed Bronze  
Price as Listed  
Alloy NAVY G

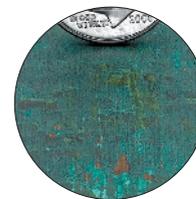

Dark Oxidized Bronze  
Add 15%  
Alloy NAVY G

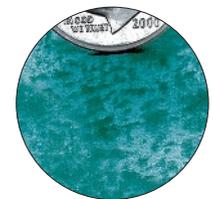

Oxidized Bronze  
Add 15%  
Alloy NAVY G

Polished Bronze  
Add 30%  
Alloy NAVY G

Traditional Patina  
Add 30%  
Alloy NAVY G

Turquoise Patina  
Add 30%  
Alloy NAVY G

Note: Vertical grain is standard all all cast aluminum and bronze letters. Horizontal grain can be requested.

PATINA FINISHES: All Patinas, by their very nature, will vary from letter to letter and order to order. These finishes will change in appearance over time depending on contact with moisture and temperature. Patinas can "bleed" onto the installation surface when installed outside.
